

End-to-End Classification Workflow

Package an end-to-end classifier as a tested, observable service.

Learning outcomes

01  Connect validation, preprocessing, training, and evaluation.

02  Capture metadata and a repeatable training command.

03  Define an inference schema.

The concept system

01

training workflow

02

artifacts

03

schemas

04

model cards

A repeatable reasoning loop

Turn the week-seven experiment into a repeatable training pipeline.

Guided lab

LAB BRIEF

Turn the week-seven experiment into a repeatable training pipeline.

workbook / tests / evidence

01

Frame

Define inputs, outputs, and success criteria.

02

Build

Implement the smallest correct workflow.

03

Verify

Test normal, boundary, and failure cases.

04

Explain

Record the evidence and remaining limits.

Portfolio deliverable

A versioned model artifact, schema, and model card.

QUALITY GATE

-  **Reproducible**
-  **Tested**
-  **Decision-relevant**

WEEKLY ASSESSMENT

Production Inference Service

API 25%, tests 25%, artifact 20%, observability 20%, documentation 10%.

What should remain after the lesson?

CONCEPT

training workflow + artifacts

PRACTICE

Turn the week-seven experiment into a repeatable training pipeline.

EVIDENCE

A versioned model artifact, schema, and model card.
