

Experiments, Versioning and Monitoring

Automate reliable releases and make model
behavior observable.

Learning outcomes

01  Track code, data, parameters, metrics, and artifacts.

02  Define promotion and rollback criteria.

03  Design monitoring around model risks.

The concept system

01

experiment tracking

02

model registry

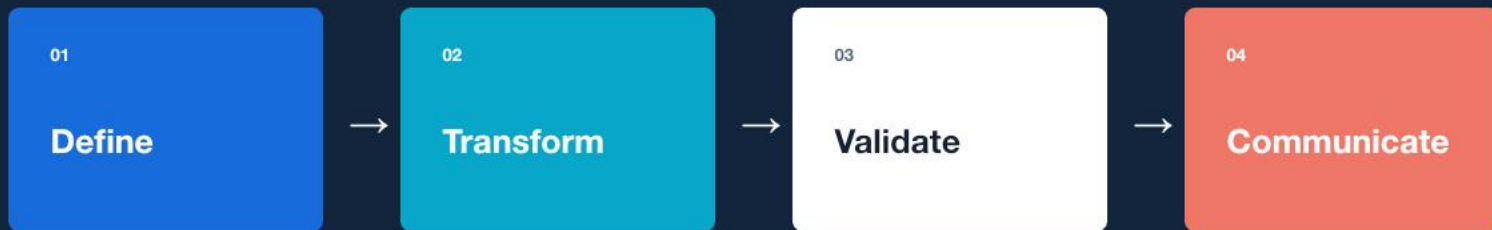

03

promotion

04

observability

A repeatable reasoning loop

Create an experiment lineage and staged release checklist.

Guided lab

LAB BRIEF

**Create an experiment lineage
and staged release checklist.**

workbook / tests / evidence

01

Frame

Define inputs, outputs, and success criteria.

02

Build

Implement the smallest correct workflow.

03

Verify

Test normal, boundary, and failure cases.

04

Explain

Record the evidence and remaining limits.

Portfolio deliverable

A model release record, rollback plan, and alert specification.

QUALITY GATE

-  **Reproducible**
-  **Tested**
-  **Decision-relevant**

WEEKLY ASSESSMENT

Releasable ML System

Reproducibility 25%, CI 20%, architecture 20%, lineage 20%, operations 15%.

What should remain after the lesson?

CONCEPT

experiment tracking + model registry

PRACTICE

Create an experiment lineage and staged release checklist.

EVIDENCE

A model release record, rollback plan, and alert specification.
