

Capstone Integration and Demo

Turn technical evidence into a defensible
product decision and live demonstration.

Learning outcomes

01  Integrate data, modelling, software, and communication.

02  Run a live demo with a tested fallback.

03  Defend tradeoffs and define the next step.

The concept system

01

integration

02

demo design

03

tradeoffs

04

roadmaps

A repeatable reasoning loop

Rehearse the capstone from problem statement to monitored prediction.

Guided lab

LAB BRIEF

Rehearse the capstone from problem statement to monitored prediction.

workbook / tests / evidence

01

Frame

Define inputs, outputs, and success criteria.

02

Build

Implement the smallest correct workflow.

03

Verify

Test normal, boundary, and failure cases.

04

Explain

Record the evidence and remaining limits.

Portfolio deliverable

A deployed capstone, repository, model card, deck, and demo recording.

QUALITY GATE

-  **Reproducible**
-  **Tested**
-  **Decision-relevant**

WEEKLY ASSESSMENT

Production-Minded Capstone

Problem 20%, evaluation 20%, engineering 20%, usability 15%, communication 15%, responsibility 10%.

What should remain after the lesson?

CONCEPT

integration + demo design

PRACTICE

Rehearse the capstone from problem statement to monitored prediction.

EVIDENCE

A deployed capstone, repository, model card, deck, and demo recording.
